

TAG Medical Products

Company Profile

Overview

TAG Medical Products Ltd. was established in 1949 at Kibbutz Gaaton as a producer of industrial tools.

In 1994, the company shifted direction to focus on developing and manufacturing state of the art medical equipment.

TAG is sited on three campuses - the main facility in the Bar-Lev Industrial Park, the original plant at Kibbutz Gaaton, and the innovation hub "TAG Dream" in Yokneam. The company has over 400 employees across all three locations.

Our Partners

TAG works closely with the major players in the medical field as an approved vendor (dock to stock) and as an approved designer, with TAG serving as the legal manufacturer for most of the products in question.

TAG Medical Capabilities

In House

- **CNC** - 90% of our products

Who We Are

TAG specializes in the design and production of innovative medical devices for use in minimally invasive procedures.

We are an all in one shop for the development and production of mechanical medical devices.

R&D and Engineering

TAG manufactures 95% of its **products**, with a team of over 55 engineers collaborating to introduce an average of four innovative products each year.

Our R&D team engages in extensive and continuous medical training and works closely both with our users – who include world-leading surgeons – and with OEM development teams to forge and maintain a strong and responsive connection to their needs and ideas.

Product Life

Production

- Machining
- Injection Molding
- Suture Braiding
