Tallahassee

HDPE play system model Tallahassee

Recycled HDPE: 

Steel: 

 Ages 5-12

 Users 416

 Dimensions L: 53'-47" W: 97'-18" H: 32" | L: 1671 W: 3037 H: 1000 cm

 Safety Zone 74'-6.7"/136'-7.6" | 2271 / 4163 cm

 Fall Height 9'-3.4" | 290 cm

 Accessible

The Tallahassee play system is a spectacular playground equipment that combines the design of a magical castle with a multi-level maze. The structure rises to an impressive height and includes towers with several levels connected by hanging bridges, winding slides, and challenging climbing walls. Children can discover many internal levels, each offering new experiences and surprising routes, reminiscent of an adventure in a secret castle. The structure invites children to embark on a real exploration journey as they pass through narrow passages, climb to the peaks of the towers, and use peepholes to observe the environment from different angles. The combination of the structure's height, many levels, and maze-like design makes Tallahassee a perfect structure for children seeking both physical and mental challenges, enjoying an imaginative adventure game.

Recycled HDPE

HDPE (High-Density Polyethylene) is a recycled material made from high-density polyethylene, produced from recycled materials that allows for further recycling. It excels in resistance to UV rays and wear and tear, making it particularly suitable for use in outdoor playground equipment. Its touch is smooth and pleasant, and its appearance is maintained over time. The advantages include high resistance to harsh weather conditions and environmental preservation. The material is capable of absorbing high energy, which helps prevent fractures.

Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. The steel meets strict EN 1176 standards, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

Accessibility Platform

The accessibility platform is a structure that is accessible for children with disabilities, allowing them to participate in play equally and safely. It is an ideal addition to any structure and playground that requires accessibility standards.

Designed Panel

The designed panel adds an aesthetic and unique dimension to the playground equipment, enhancing the overall play experience. The panel allows players to feel part of a creative and imaginative world, designed to align with the narrative of the playground. The design ensures easy and safe access to play activities, while maintaining a sense of security and enjoyment.

Transparent Slide Sections

Transparent slide sections add an interesting visual element to slides. The transparency of the sections allows for maintaining eye contact between the companion and the player during the slide, enhancing the sense of security and comfort for both parties. The transparent sections provide a unique and enjoyable sliding experience while maintaining a sense of connection and safety.

Climbing Wall

The climbing wall offers a physical challenge that develops the muscle strength, coordination and weight of the players. Climbing the wall improves their problem solving. This is a place where players overcome fears and develop courage and self-confidence.

Rope Ladder

The rope ladder provides vertical access to the play structure and encourages players to develop physical skills such as strength, coordination, and balance. Climbing the rope ladder strengthens hand and leg muscles and develops a sense of balance. The ladder encourages players to face challenges and develop flexibility and agility.

Toddler Slide

The toddler slide provides a safe and enjoyable sliding experience for little ones. It develops coordination, movement, balance, and self-confidence for young players.

Overlays

Unique and designed visual elements that enhance the overall appearance of the structure. The overlays are durable and add an extra layer of creativity and enriching play experience for players.

Engravings

Engravings add designs and illustrations to parts of the structure, enriching the play experience with an interesting visual element.

Physical Development

Climbing - Strengthening arm and leg muscles, developing fitness and endurance. **Sliding** - Strengthening leg and arm muscles and improving coordination.

Cognitive Development

Spatial awareness- Improving the ability to understand and navigate space through mazes and courses.. **Curiosity** - Encouraging exploration and discovery through equipment providing new and unfamiliar experiences.

Emotional Development

Imagination- Encouraging imagination and creating play worlds. **Confidence**- Building self-confidence and belief in one's personal abilities. **Independence**- Developing independence and the ability to make personal decisions.

Social Development

Empathy- Developing empathy and the ability to understand and empathize with others' feelings. **Respect for boundaries**- Learning the importance of respecting personal and social boundaries. **Friendship creation**- Creating friendships and strengthening social bonds.

Motor Development

Hand-eye coordination - Developing coordination and precision in activities requiring fine motor skills. **Foot-eye coordination** - Improving coordination and balance through various equipment.
