Accessible

Magical Cabin is a play structure suitable for imaginative play for toddlers. Constructed from durable HDPE, it helps develop a sense of independence and privacy, as well as social skills during shared play.

### Recycled HDPE

HDPE (High-Density Polyethylene) is a recycled material made from high-density polyethylene, produced from recycled materials that allows for further recycling. It excels in resistance to UV rays and wear and tear, making it particularly suitable for use in outdoor playground equipment. Its touch is smooth and pleasant, and its appearance is maintained over time. The advantages include high resistance to harsh weather conditions and environmental preservation. The material is capable of absorbing high energy, which helps prevent fractures.

### Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. The steel meets strict EN 1176 standards, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

## Ventilation Window

A ventilation window provides a sense of openness and ventilates the structure, enhancing the play experience and adding an element of enjoyment and freshness. It also allows for maintaining eye contact between the player and companion, strengthening the sense of security.

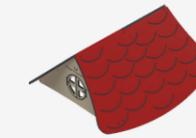

## Overlays

Unique and designed visual elements that enhance the overall appearance of the structure. The overlays are durable and add an extra layer of creativity and enriching play experience for players.

## Engravings

Engravings add designs and illustrations to parts of the structure, enriching the play experience with an interesting visual element.

## Designed Roof

The designed roof adds an aesthetic and interesting element to the play structure, providing shade and protection from the sun and rain. In addition to its functional role, the designed roof integrates with the story the play structure tells, enhancing the play experience. The roof design adds a dimension of imagination and creativity, allowing players to experience the structure as a magical and fascinating place, enhancing their enjoyment of the play.

### Motor Development

Foot-eye coordination - Improving coordination and balance through various equipment.

### Cognitive Development

Spatial awareness- Improving the ability to understand and navigate space through mazes and courses.  
Curiosity - Encouraging exploration and discovery through equipment providing new and unfamiliar experiences.

### Physical Development

Climbing - Strengthening arm and leg muscles, developing fitness and endurance  
Crawling - Strengthening abdominal and back muscles, improving coordination and flexibility.
