Lil Track

Toddler play structure model Lil Track

Recycled HDPE: 

Steel: 

Balancing

Crawling

 Ages 2-5

 Users 9

 Dimensions L: 6'-7.1" W: 3'-8.9" H: 3'-6.2" | cm L: 206 W: 117 H: 110

 Safety Zone 15'-8.8"/18'-8.1" | cm 478 / 569

 Fall Height 1'-3.4" | 40 cm

 Accessible

A toddler obstacle course for sensory stimulation and development. Composed of a base of three HDPE panels that enable crawling through a rubber door, games for motor and cognitive development, and a step for rest, climbing, and jumping. Encourages curiosity and exploration. Suitable for individual or group play. Specially developed for young children and designed to allow the parent line of sight and availability to support at every stage.

Recycled HDPE

HDPE (High-Density Polyethylene) is a recycled material made from high-density polyethylene, produced from recycled materials that allows for further recycling. It excels in resistance to UV rays and wear and tear, making it particularly suitable for use in outdoor playground equipment. Its touch is smooth and pleasant, and its appearance is maintained over time. The advantages include high resistance to harsh weather conditions and environmental preservation. The material is capable of absorbing high energy, which helps prevent fractures.

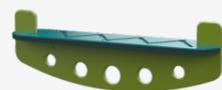

Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. The steel meets strict EN 1176 standards, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

Moving Game

The moving game provides dynamic activity that develops players' coordination, strength, and motor skills.

Game

The game allows players to explore and engage in various activities, enhancing their creativity, imagination, and cognitive skills. It encourages players to play together.

Game

The game allows players to explore and engage in various activities, enhancing their creativity, imagination, and cognitive skills. It encourages players to play together.

Connectors

The connectors in our play structures are designed to securely and safely join parts of the structure. They are made of durable and high-quality materials, ensuring long-term durability without wear.

Moving Game

The moving game provides dynamic activity that develops players' coordination, strength, and motor skills.

Motor Development

Foot-eye coordination - Improving coordination and balance through various equipment. Hand-eye coordination - Developing coordination and precision in activities requiring fine motor skills.

Cognitive Development

Spatial awareness- Improving the ability to understand and navigate space through mazes and courses. Curiosity - Encouraging exploration and discovery through equipment providing new and unfamiliar experiences. Creativity- Developing creative thinking and imagination in open and interactive play.

Emotional Development

Courage- Facing fears and new challenges. Confidence- Building self-confidence and belief in one's personal abilities. Independence- Developing independence and the ability to make personal decisions. Resilience- Coping with failure and trying again.

Physical Development

Crawling - Strengthening abdominal and back muscles, improving coordination and flexibility. Balancing- Improving balance and posture.
