Climbing Posts

Climbing posts - Robinia wood fitness course

Robinia Wood:

Balancing

Climbing

Ages 5-12

Users 3

Dimensions L: 3'-10.8" W: 9.2" H: 3'-2.4" | L: 122 W: 24 H: 100 cm

Safety Zone 15'-4.5"/12' | 469 / 366

Fall Height 3'-2.4" | 100 cm

Accessible

The Climbing Posts structure is designed to offer children an experience of climbing natural Robinia Wood posts, mimicking the challenge of a forest tree. The structure invites children to try vertical climbing, enhancing body strength and balance. The design of the posts provides a sense of height and challenge, encouraging children to overcome obstacles and develop self-confidence during play.

Psagot Playgrounds

Motor Development

Foot-eye coordination - Improving coordination and balance through various equipment. Hand-eye coordination - Developing coordination and precision in activities requiring fine motor skills.

Empathy- Developing the ability to understand and accept differences and complexities. Resilience- Coping with failure and trying again.

Physical Development

Jumping- Improving leg strength and balance. Balancing- Improving balance and posture.

Robinia Wood

European Robinia wood is natural, robust, and durable, particularly suitable for use in outdoor playground equipment. It complies with stringent standards such as FSC, has a smooth and pleasant touch, a natural and authentic appearance, and integrates well with natural surroundings. Its high durability, long lifespan, and being a natural and safe material make it a popular choice for use in playground equipment.

Climbing Element

The climbing element offers a physical challenge that develops muscle strength, coordination, and balance. Climbing on the element encourages children to overcome fears and build self-confidence and perseverance. Additionally, the element helps develop problem-solving skills as children look for efficient and safe ways to climb.
