Nacional

Robina fitness structure model Nacional

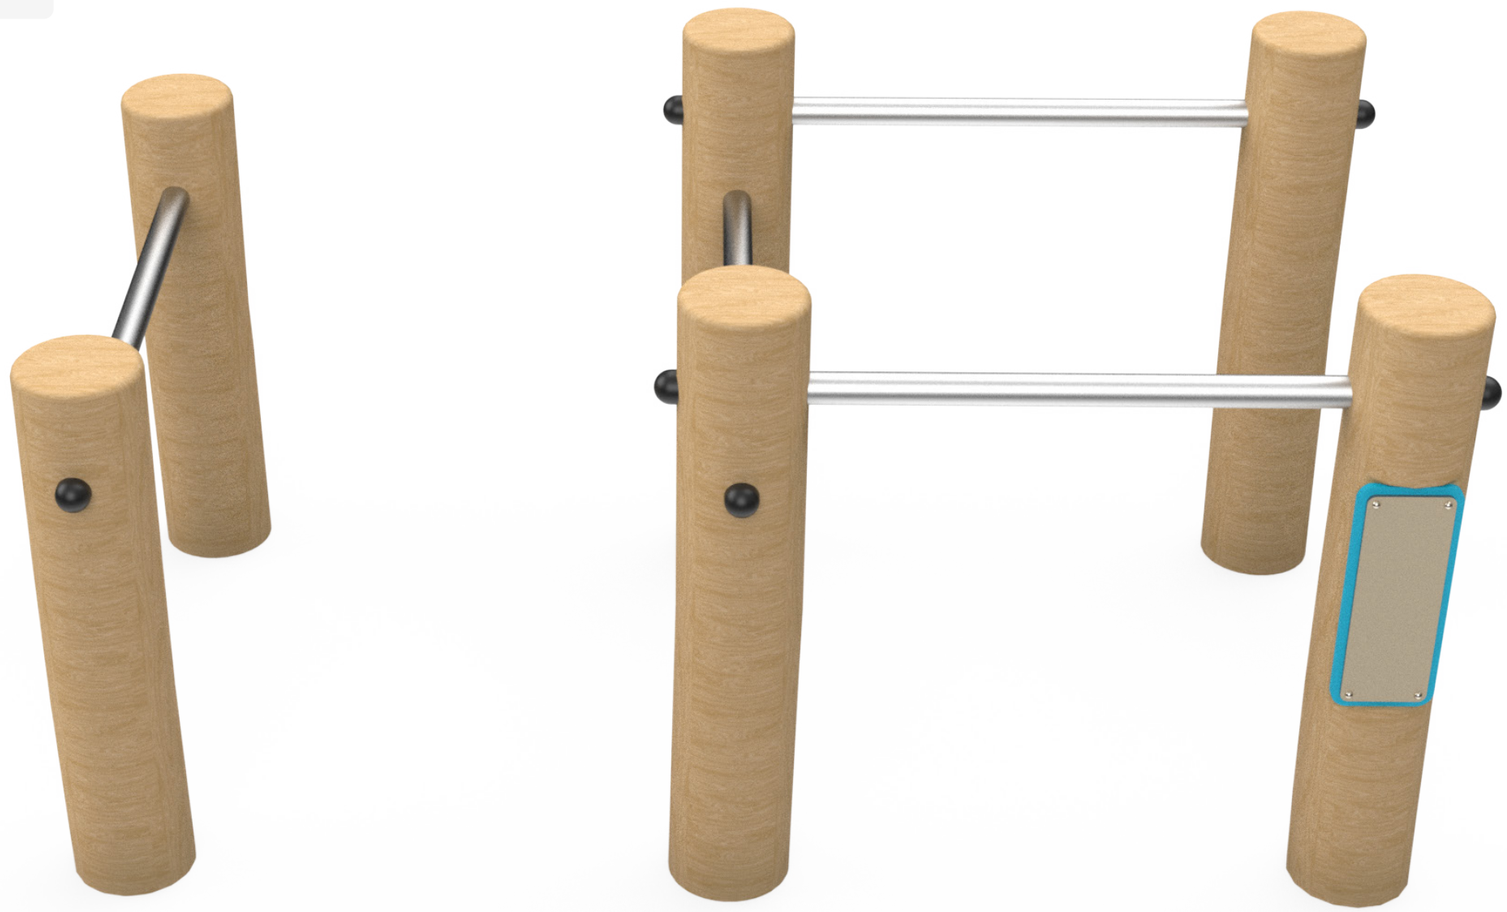

Steel:

Robinia Wood:

Balancing

Hanging

Jumping

Ages 5-12

Users 4

Dimensions L: 5'-4.5" W: 3'-0.5" | L: 168 W: 95 cm

Safety Zone: 15'-1.4" / 17'-5.9"

Fall Height 2'-3.56" | 70 cm

The Nacional is a challenging climbing structure combining power-to-stability transitions and movement coordination. It consists of natural Robinia posts connected by horizontal stainless-steel bars for traversing or balancing.

Designed to strengthen the upper body, improve grip and coordination, suited for teens and adults as part of a natural fitness circuit. Its organic design blends harmoniously with the environment and withstands outdoor conditions

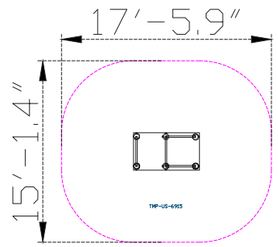

Robinia Wood

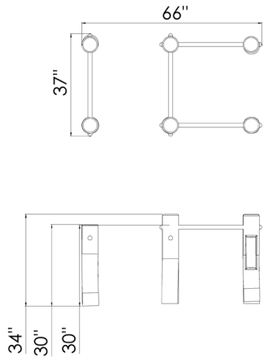

European Robinia wood is natural, robust, and durable, particularly suitable for use in outdoor playground equipment. It complies with stringent standards such as FSC, has a smooth and pleasant touch, a natural and authentic appearance, and integrates well with natural surroundings. Its high durability, long lifespan, and being a natural and safe material make it a popular choice for use in playground equipment.

Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. The steel meets strict EN 1176 standards, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

Emotional Development

Patience- Practicing patience and waiting for one's turn. Perseverance- Encouraging perseverance and repeated attempts. Achievement- Developing a sense of accomplishment and satisfaction from success in challenging equipment.

Physical Development

Climbing - Strengthening arm and leg muscles, developing fitness and endurance. Hanging - Strengthening arm, back, and shoulder muscles. Balancing- Improving balance and posture.

Cognitive Development

Concentration- Developing the ability to focus and maintain attention in equipment requiring concentration. Regulation of force- Developing the ability to apply the right amount of force according to the activity.

Motor Development

Core muscle strengthening- Strengthening abdominal and back muscles through challenging equipment.
