Play Panel

Hourglass play panel

Recycled HDPE: 

Steel: 

An hourglass game panel for measuring time (on a swing, for example) is a useful and educational device that allows both children and adults to organize turns on playground equipment. The board displays an hourglass that measures a 5-minute time period, helping children keep track of turns during playtime. Using the board encourages cooperation and understanding of the concept of time, providing a simple solution for managing turns in a fresh, fun way. The panel is made of durable materials and is designed to seamlessly integrate with the rest of the playground equipment.

Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. The steel meets strict EN 1176 and MATI 1498/1497 standards, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

Recycled HDPE

HDPE (High-Density Polyethylene) is a recycled material made from high-density polyethylene, produced from recycled materials that allows for further recycling. It excels in resistance to UV rays and wear and tear, making it particularly suitable for use in outdoor playground equipment. Its touch is smooth and pleasant, and its appearance is maintained over time. The advantages include high resistance to harsh weather conditions and environmental preservation. The material is capable of absorbing high energy, which helps prevent fractures.
