Micky

Robinia wood rope climbing structure model Micky

Robinia Wood:

Rope Cables:

Climbing

Ages 5-12

Users 16

Dimensions L: 5'-7.2" W: 5'-6.4" H:3'-10.1" | L: 175 W: 173 H: 120 cm

Safety Zone 19'/19' | 579 / 579 cm

Fall Height 3'-10.1" | 120 cm

Accessible

The Micky climbing structure is made from natural European Robinia Wood and integrates naturally into outdoor spaces. It is designed for climbing and provides children with an enjoyable physical challenge, helping them strengthen their muscles, improve balance, and develop coordination. The simple and aesthetic design of the structure, along with the use of natural materials, creates a harmonious environment that encourages physical activity through play.

Log Play Surface

The log play surface provides players with a natural and challenging play space, simulating walking or standing on a tree trunk. The surface combines a natural appearance with stability and safety, encouraging players to develop their balance and coordination while moving.

Rope Ladder

The rope ladder provides vertical access to the play structure and encourages players to develop physical skills such as strength, coordination, and balance. Climbing the rope ladder strengthens hand and leg muscles and develops a sense of balance. The ladder encourages players to face challenges and develop flexibility and agility.

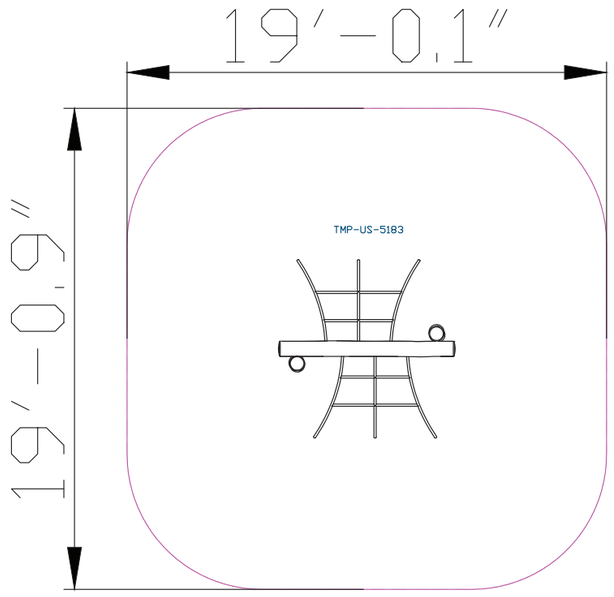

Robinia Wood

European Robinia wood is natural, robust, and durable, particularly suitable for use in outdoor playground equipment. It complies with stringent standards such as FSC, has a smooth and pleasant touch, a natural and authentic appearance, and integrates well with natural surroundings. Its high durability, long lifespan, and being a natural and safe material make it a popular choice for use in playground equipment.

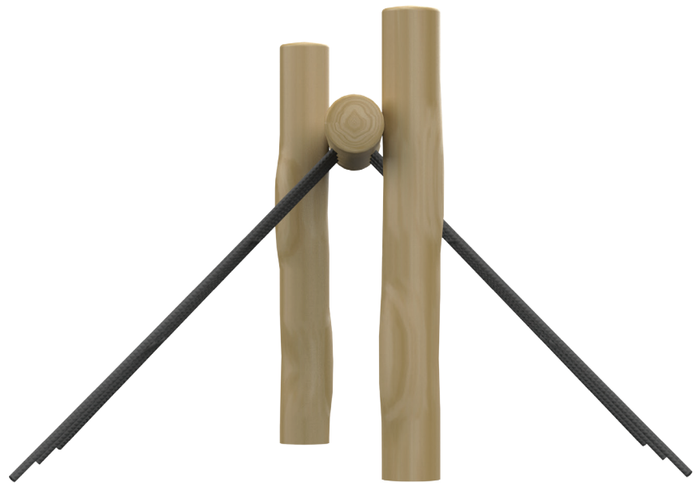

Rope Cables

Rope Cables are made of synthetic polypropylene (PP) fibers combined with a galvanized steel core for improved strength and durability. They meet strict standards such as MATI 1498/1497, ASTM A240, and EN 10088, ensuring durability and safety for use in playground equipment. The cables offer a soft and pleasant touch that does not harm the hands during use and are available in various diameters and colors, allowing for creative and aesthetic design.

Psagot Playgrounds

Motor Development

Foot-eye coordination - Improving coordination and balance through various equipment. Hand-eye coordination - Developing coordination and precision in activities requiring fine motor skills.

Cognitive Development

Spatial awareness- Improving the ability to understand and navigate space through mazes and courses.
