Ninja Pipe Path

Ninja Pipe Path - Ninja Course

Recycled HDPE:

Steel:

Balancing

Jumping

Ages 5-12

Users 8

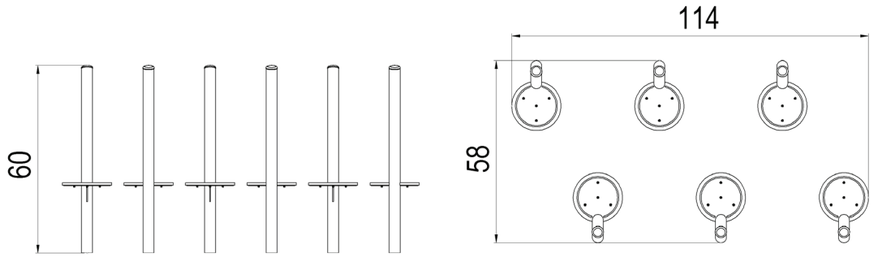

Dimensions L: 9-3.4" W: 4'-5.4" H: 4'-10.4" | L: 290 W: 139 H: 152 cm

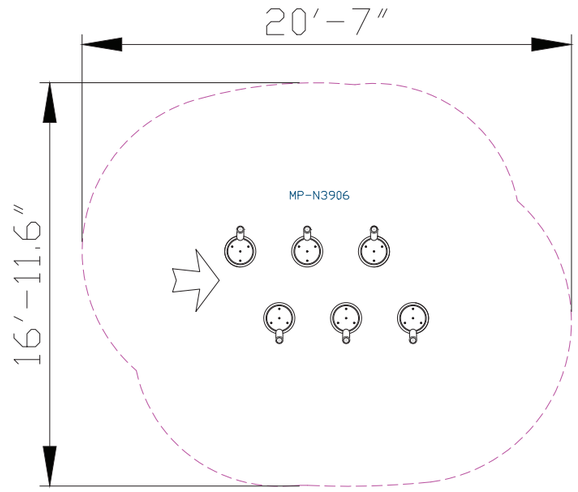

Safety Zone 20'-6.9"/16'-11.6" | 625 / 516 cm

Fall Height 1'-9.1" | 55 cm

Accessible

When you say Ninja Warrior, you say strong and flexible legs! Stable legs that allow for jumping and a strong grip on any surface are essential. Any ninja training on the pipe path exercises their calf muscles and develops leg flexibility and mobility by hopping from platform to platform. The tired ninja can use the pipes supporting the jumping platforms for assistance, while the well-trained ninja will complete the obstacle using only their legs.

Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. The steel meets strict EN 1176 and MATI 1498/1497 standards, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

Recycled HDPE

HDPE (High-Density Polyethylene) is a recycled material made from high-density polyethylene, produced from recycled materials that allows for further recycling. It excels in resistance to UV rays and wear and tear, making it particularly suitable for use in outdoor playground equipment. Its touch is smooth and pleasant, and its appearance is maintained over time. The advantages include high resistance to harsh weather conditions and environmental preservation. The material is capable of absorbing high energy, which helps prevent fractures.

Psagot Playgrounds

Tread Surface

The tread surface provides support and safety during play on the structure. The surface is designed to prevent slipping and improve players' stability and security.

Hand and Foot Holds

Hand and foot holds provide support during play and use of the structure. Players develop their strength and coordination while maintaining stability and security.

Motor Development

Foot-eye coordination - Improving coordination and balance through various equipment. Hand-eye coordination - Developing coordination and precision in activities requiring fine motor skills.

Cognitive Development

Concentration- Developing the ability to focus and maintain attention in equipment requiring concentration. Spatial awareness- Improving the ability to understand and navigate space through mazes and courses.. Regulation of force- Developing the ability to apply the right amount of force according to the activity.

Emotional Development

Courage- Facing fears and new challenges. Confidence- Building self-confidence and belief in one's personal abilities. Independence- Developing independence and the ability to make personal decisions. Resilience- Coping with failure and trying again. Perseverance- Encouraging perseverance and repeated attempts. Achievement- Developing a sense of accomplishment and satisfaction from success in challenging equipment.

Social Development

Empathy- Developing empathy and the ability to understand and empathize with others' feelings. Respect for boundaries- Learning the importance of respecting personal and social boundaries. Friendship creation- Creating friendships and strengthening social bonds.

Physical Development

Jumping- Improving leg strength and balance. Balancing- Improving balance and posture.
