Modular Jumping Structure - Dog Play

Modular Jumping Structure - Dog play

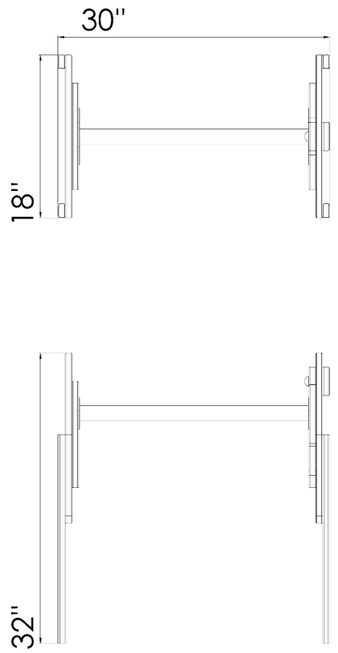

Recycled HDPE:

Steel:

Dimensions L: 2'-5.6" W: 1'-5.7" H: 2'-7.5" | L: 77 W: 46 H: 82

This structure offers adjustable jumping difficulty levels for both training and play. Part of the Psagot Playgrounds dog equipment series, it features a dynamic jumping pole system. Made from powder-coated steel and premium pinewood, it offers the same high-quality finish as children's playground equipment, with non-toxic paint and carefully sanded wood to avoid splinters.

Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. The steel meets strict EN 1176 and MATI 1498/1497 standards, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

Recycled HDPE

HDPE (High-Density Polyethylene) is a recycled material made from high-density polyethylene, produced from recycled materials that allows for further recycling. It excels in resistance to UV rays and wear and tear, making it particularly suitable for use in outdoor playground equipment. Its touch is smooth and pleasant, and its appearance is maintained over time. The advantages include high resistance to harsh weather conditions and environmental preservation. The material is capable of absorbing high energy, which helps prevent fractures.
