The Submarine equipment is made from Robinia Wood and stainless steel.

The submarine includes two large levels. The lower level allows entry and exit through the bow and propeller via crawl tunnels, rope climbing nets, and a large bird's nest seat.

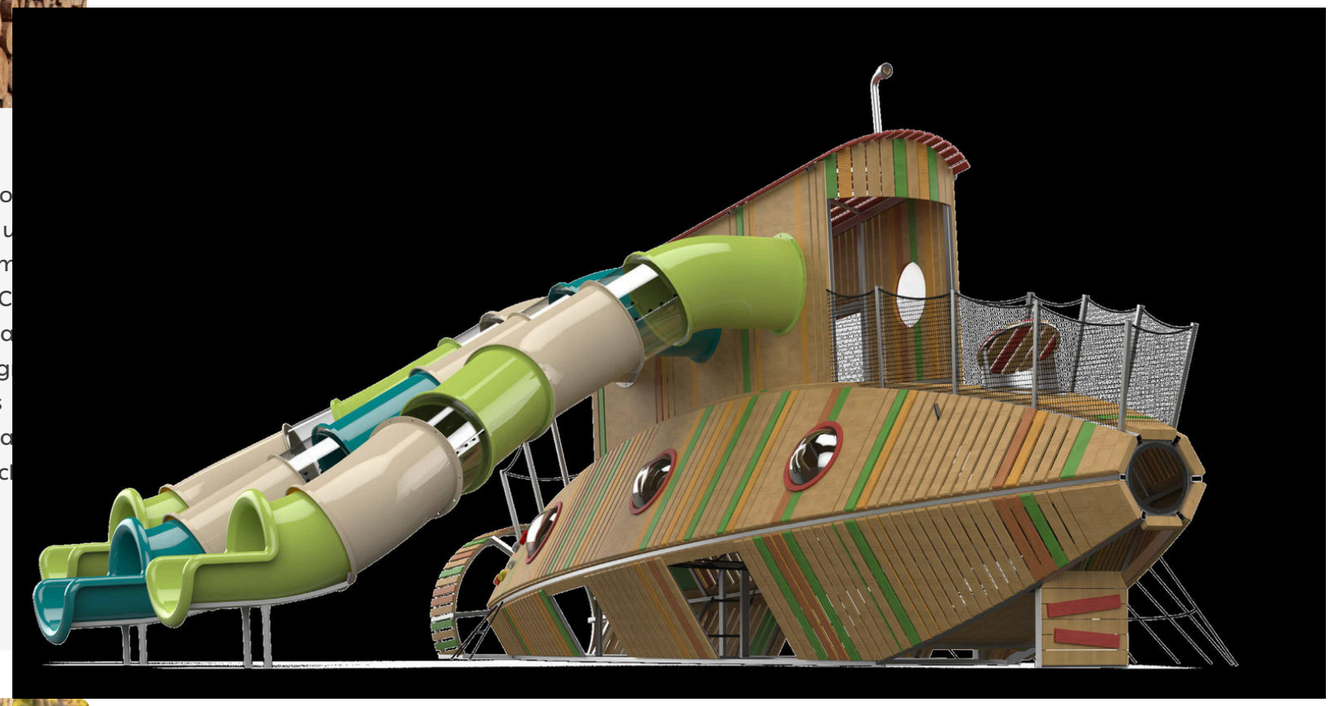

Children can climb and crawl on the propeller, on Robinia Wood beams and rubber surfaces.

The upper deck serves as a large play area with handrails for safety, a telescope, and three barrel slides at different angles.

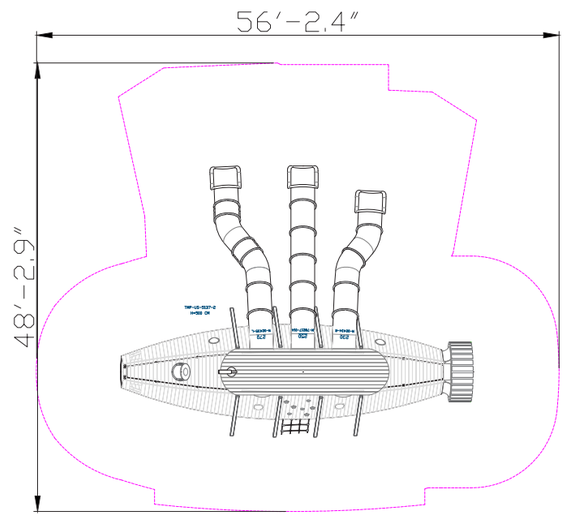

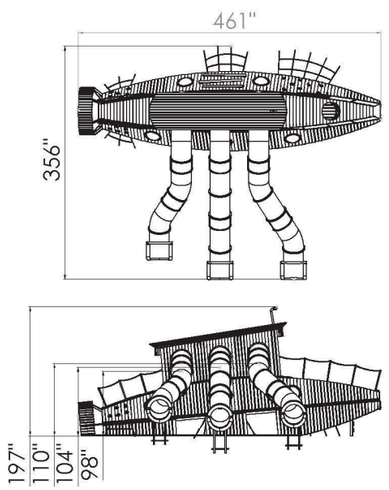

Robinia Wood

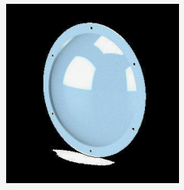

European Robinia wood is natural, ro
and durable, particularly suitable for u
outdoor playground equipment. It com
with stringent standards such as FSC
a smooth and pleasant touch, a na
and authentic appearance, and integ
well with natural surroundings. Its
durability, long lifespan, and being a na
and safe material make it a popular c
for use in playground equipment.

Roof

The clear bubble offers a unique vantage point, allowing players to see their surroundings from a different perspective, maintaining eye contact between the companion and the player and ensuring continuous, safe communication. The clear bubble enhances the sense of security for players and companions, especially in cases of young children needing support and supervision during play.

Hand and Foot Holds

Hand and foot holds provide support during play and use of the structure. Players develop their strength and coordination while maintaining stability and security.

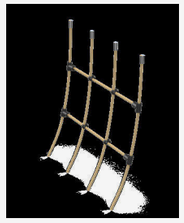

Transparent Slide Sections

Transparent slide sections add an interesting visual element to slides. The transparency of the sections allows for maintaining eye contact between the companion and the player during the slide, enhancing the sense of security and comfort for both parties. The transparent sections provide a unique and enjoyable sliding experience while maintaining a sense of connection and safety.

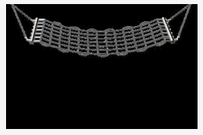

Bird’s Nest Seat

The bird's nest seat is designed as a spacious and accommodating rope basket, allowing players to sit comfortably. It provides a sense of safety and stability during play, encouraging social interactions as players sit together and enjoy the structure.

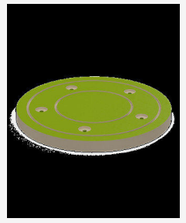

Rope Ladder

The rope ladder provides vertical access to the play structure and encourages players to develop physical skills such as strength, coordination, and balance. Climbing the rope ladder strengthens hand and leg muscles and develops a sense of balance. The ladder encourages players to face challenges and develop flexibility and agility.

Hammock

The hammock offers players a relaxing and comfortable place to swing, while developing motor skills and balance. Playing in the hammock encourages a sense of calm and security, providing an opportunity for players to unwind and connect with their surroundings interactively.

Seat

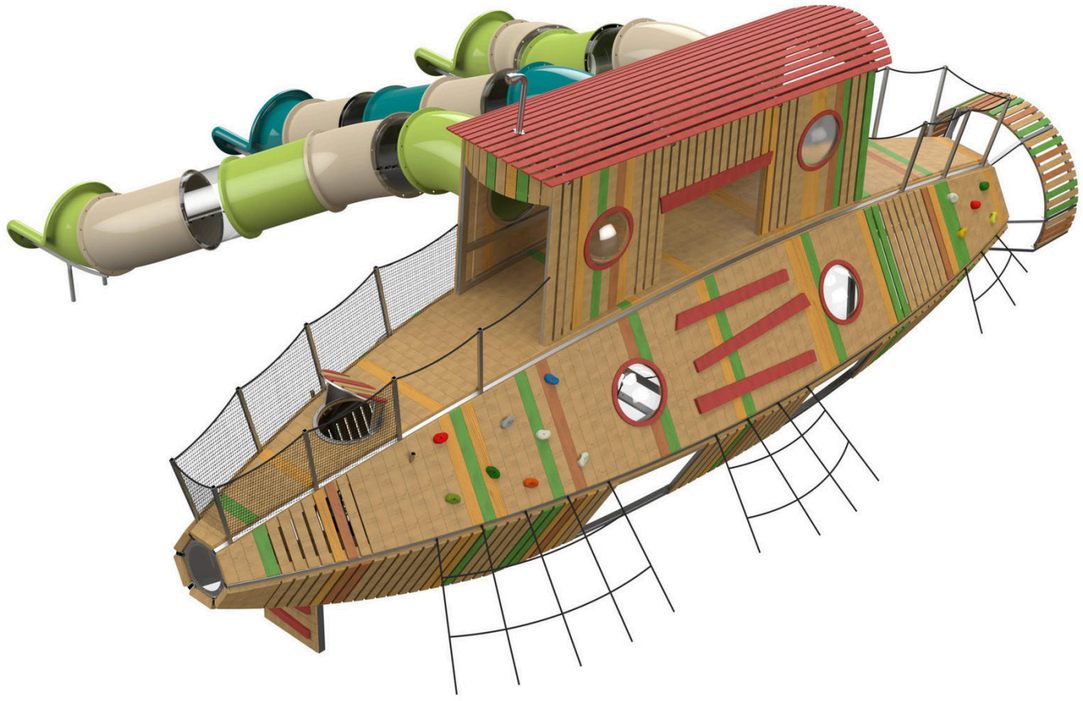

A seat that provides a small resting station during play where players can sit and rest. Suitable for short breaks or extended stays. Playing on the seat allows players to take a break from physical activity while maintaining connection with the environment and continuing social interactions.

Climbing Wall

The climbing wall offers a physical challenge that develops the muscle strength, coordination and weight of the players. Climbing the wall improves their problem solving. This is a place where players overcome fears and develop courage and self-confidence.
