TSP-5188

Teepee

This Robinia Teepee structure combines natural Robinia Wood with children's play panels, offering various play experiences such as tic-tac-toe and a seasons panel. The Teepee invites children to enter an imaginary world where they can play, communicate, and engage in diverse activities within a structure designed to resemble a Native American teepee. The installation encourages the development of children's imagination, creativity, and social skills while providing an enjoyable and enriching play experience.

Play Panel

The play panel provides a variety of interactive play options that develop players' motor and cognitive skills. Each panel offers a unique activity that stimulates thinking and encourages players to learn and discover more.

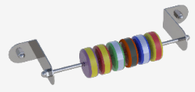

Engravings

Engravings add designs and illustrations to parts of the structure, enriching the play experience with an interesting visual element.

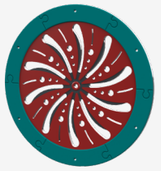

Play Panel

The play panel provides a variety of interactive play options that develop players' motor and cognitive skills. Each panel offers a unique activity that stimulates thinking and encourages players to learn and discover more.

Abacus

The abacus enhances players' mathematical and cognitive skills. Through play with the abacus, players learn to count, calculate, and solve mathematical problems in a fun and challenging way.

Play Panel

The play panel provides a variety of interactive play options that develop players' motor and cognitive skills. Each panel offers a unique activity that stimulates thinking and encourages players to learn and discover more.

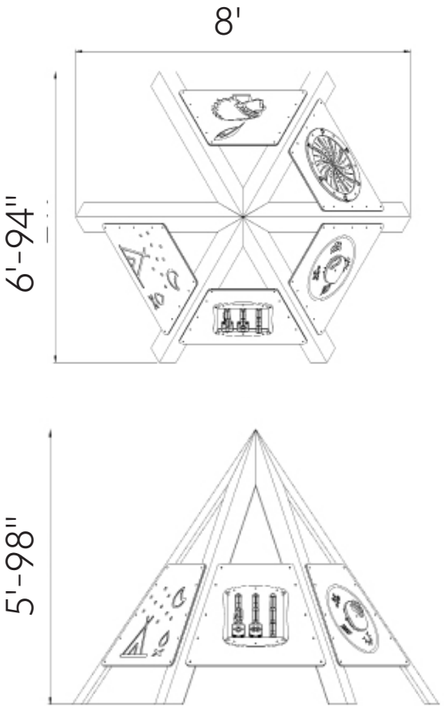

Robinia Wood

European Robinia wood is natural, robust, and durable, particularly suitable for use in outdoor playground equipment. It complies with stringent standards such as FSC, has a smooth and pleasant touch, a natural and authentic appearance, and integrates well with natural surroundings. Its high durability, long lifespan, and being a natural and safe material make it a popular choice for use in playground equipment.

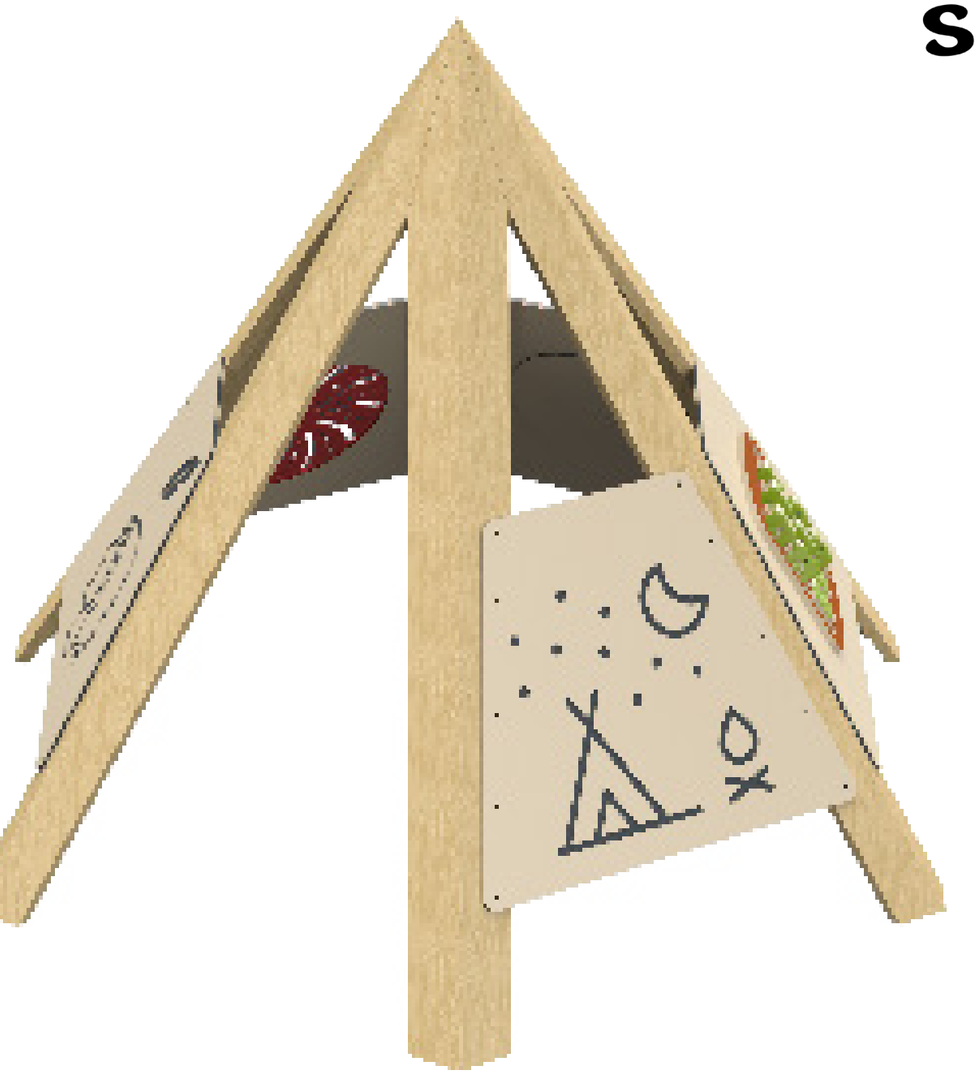

HPL

HPL panels are high-pressure laminate boards produced by saturating multiple layers of kraft paper with phenolic resin. These panels offer high resistance to abrasion, scratches, and chemical impacts, maintaining their quality in both outdoor and indoor conditions. Available in a variety of colors and textures, HPL panels are used for surfaces, walls, and furniture in playground equipment, providing an aesthetic appearance and requiring low maintenance.

Motor Development

Fine motor skills- Developing precise control in small movements through activities requiring fine manual skills. Hand-eye coordination - Developing coordination and precision in activities requiring fine motor skills.

Cognitive Development

Spatial awareness- Improving the ability to understand and navigate space through mazes and courses.. Regulation of force- Developing the ability to apply the right amount of force according to the activity. Curiosity - Encouraging exploration and discovery through equipment providing new and unfamiliar experiences. Creativity- Developing creative thinking and imagination in open and interactive play.

Emotional Development

Imagination- Encouraging imagination and creating play worlds.

Sensory Development

Touch development- Diverse sensory experiences through different materials and textures. Vision development- Rich visual experiences through vibrant colors and shapes.

Physical Development

Crawling - Strengthening abdominal and back muscles, improving coordination and flexibility.
