Accessible

The swing set is one of the central and most beloved structures in any playground. The joy of swinging, the sense of release, and the exhilarating motion are essential not only for joy but also significant in a child's development.

Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. The steel meets strict EN 1176 standards, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

Toddler Swing Seat

The toddler swing seat provides a safe and enjoyable swinging experience for the little ones. It is specially designed to fully support the toddler's body, with built-in safety harnesses to prevent falls. Swinging in the seat helps develop balance and coordination while providing a sense of security for toddlers during play.

Bearings

Bearings provide smooth and supported internal movement for the element. They ensure smooth and safe movements, enhancing the play experience by reducing friction and effort.

Chains

The chains in our play structures are made from high-quality, durable materials, ensuring safety and long-term use. They are designed to withstand harsh outdoor conditions. The chains are equipped with advanced security mechanisms that prevent disassembly and wear, ensuring a fun and safe play experience for all players.

Cognitive Development

Regulation of force- Developing the ability to apply the right amount of force according to the activity.

Physical Development

Balancing- Improving balance and posture. Swinging - Strengthening core muscles and enhancing the sense of movement.

Social Development
