Traffic light

Traffic light for a transportation-themed playground

Recycled HDPE:

Steel:

Ages 2-5

Users 2

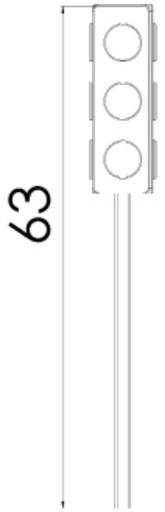

Dimensions L: 4.6" W: 11.5" H: 5'-1.4" | cm L: 12 W: 30 H: 160

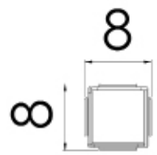

Safety Zone 13'/13' | 396/396 cm

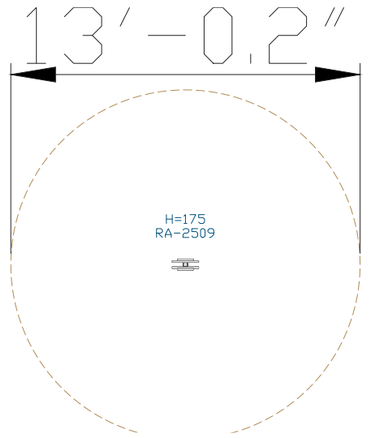

Accessible

Traffic Light is a play element designed to enrich playgrounds with the theme of transportation and educate children about the rules of the road in a fun and interactive way. Mimicking the function of a real traffic light, it helps children learn about the roles of red, yellow, and green lights in role-playing games that simulate driving.

This element is particularly suitable for transportation-themed playgrounds and encourages children to understand the importance of careful road behavior while developing social skills and understanding how to navigate road safety.

Recycled HDPE

HDPE (High-Density Polyethylene) is a recycled material made from high-density polyethylene, produced from recycled materials that allows for further recycling. It excels in resistance to UV rays and wear and tear, making it particularly suitable for use in outdoor playground equipment. Its touch is smooth and pleasant, and its appearance is maintained over time. The advantages include high resistance to harsh weather conditions and environmental preservation. The material is capable of absorbing high energy, which helps prevent fractures.

Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. The steel meets strict EN 1176 standards, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.
