Mushroom Spring

Spring model Mushroom

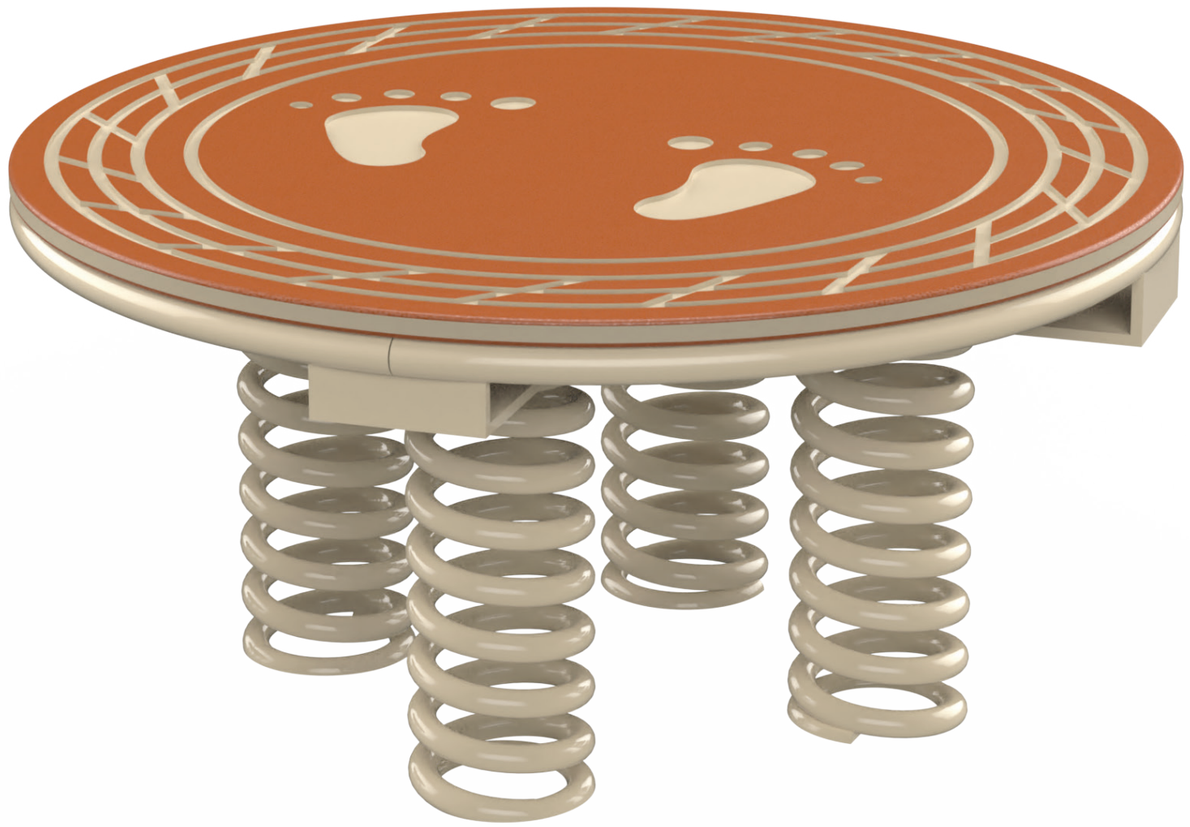

Recycled HDPE:

Steel:

Hanging

Jumping

Swinging

Ages 2-5

Users 1

Dimensions L: 2'-6.7" W: 2'-6.7" H: 1'-3.4" | cm L: 80 W: 80 H: 40

Safety Zone 16'-3.0" | cm 495.3

Fall Height 3'-2" | 100 cm

Accessible

A play structure for jumping and balancing, either in place or jumping from the device onto an impact-absorbing surface. The treading surface is made of engraved HDPE attached to 4 springs.

Motor Development

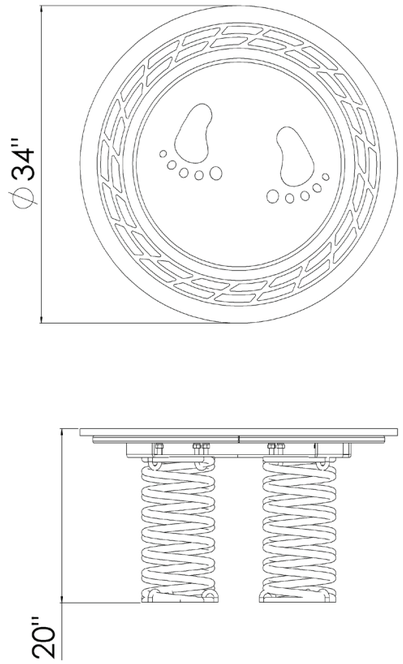

Core muscle strengthening- Strengthening abdominal and back muscles through challenging equipment.

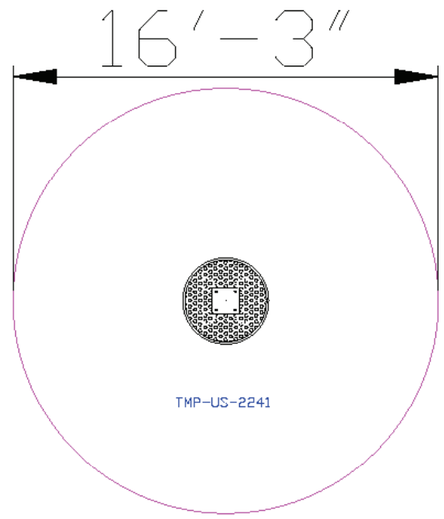

Cognitive Development

Regulation of force- Developing the ability to apply the right amount of force according to the activity.

Physical Development

Balancing- Improving balance and posture.

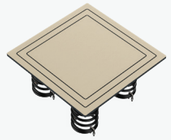

Recycled HDPE

HDPE (High-Density Polyethylene) is a recycled material made from high-density polyethylene, produced from recycled materials that allows for further recycling. It excels in resistance to UV rays and wear and tear, making it particularly suitable for use in outdoor playground equipment. Its touch is smooth and pleasant, and its appearance is maintained over time. The advantages include high resistance to harsh weather conditions and environmental preservation. The material is capable of absorbing high energy, which helps prevent fractures.

Springy Mat

The springy mat encourages players to jump and move. Playing on the springy mat develops players' strength, coordination, and balance.

Springs

The springs are made of high-quality, durable materials, designed safely without pinching or entrapments. They allow for movement and rocking games, developing motor skills, spatial awareness, and a sense of balance.
