Hamster Wheel B

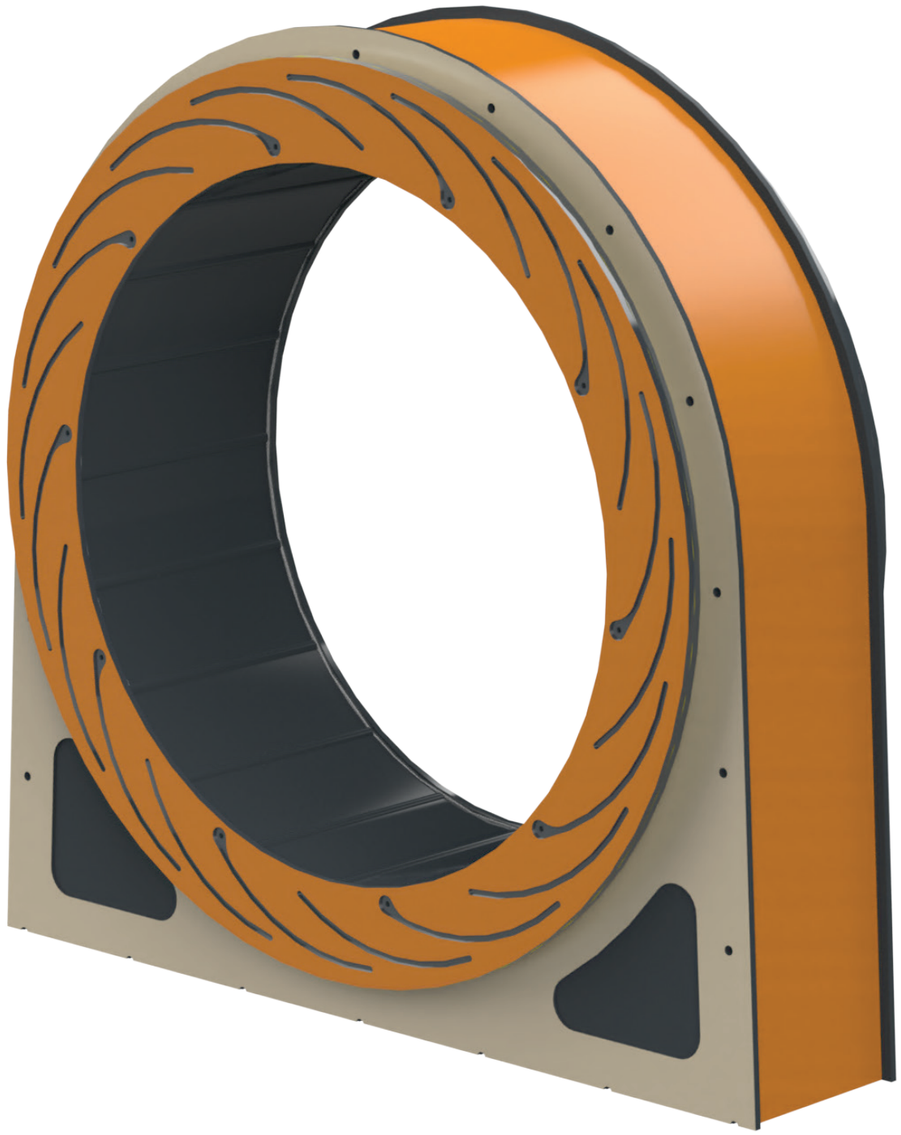

Spinner model Hamster Wheel B

Recycled HDPE:

Steel:

Balancing

Rotation

Ages 5-12

Users 2

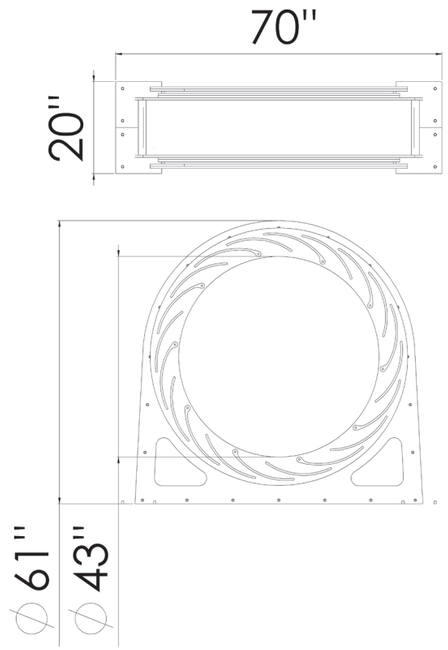

Dimensions L: 5' W: 1'-24" H: 4'-92" | cm L: 157 W: 39 H: 154

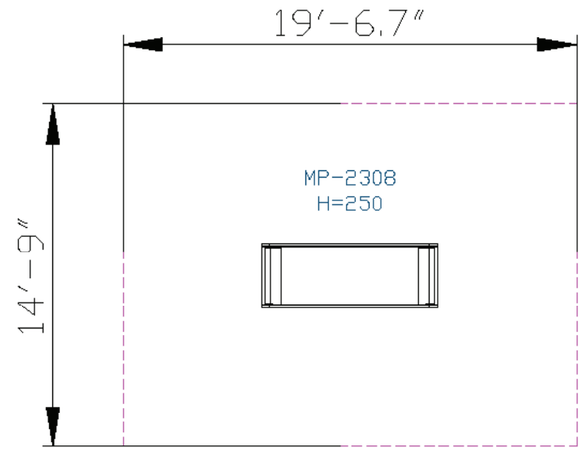

Safety Zone 19'-6.7"/14'-9" | cm 596 / 450

Fall Height 3'-2" | 100 cm

Accessible

Rotating drum carousel for an enjoyable and challenging spinning game. Similar to a hamster wheel, the player enters the 'drum' in a sitting, lying, or standing position and rotates up to 360 degrees by themselves or with help. A particularly immersive and funny device! Strengthens the vestibular system, balance, and posture.

Recycled HDPE

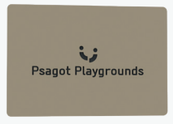

HDPE (High-Density Polyethylene) is a recycled material made from high-density polyethylene, produced from recycled materials that allows for further recycling. It excels in resistance to UV rays and wear and tear, making it particularly suitable for use in outdoor playground equipment. Its touch is smooth and pleasant, and its appearance is maintained over time. The advantages include high resistance to harsh weather conditions and environmental preservation. The material is capable of absorbing high energy, which helps prevent fractures.

Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. The steel meets strict EN 1176 standards, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

Engravings

Engravings add designs and illustrations to parts of the structure, enriching the play experience with an interesting visual element.

Rotating Drum

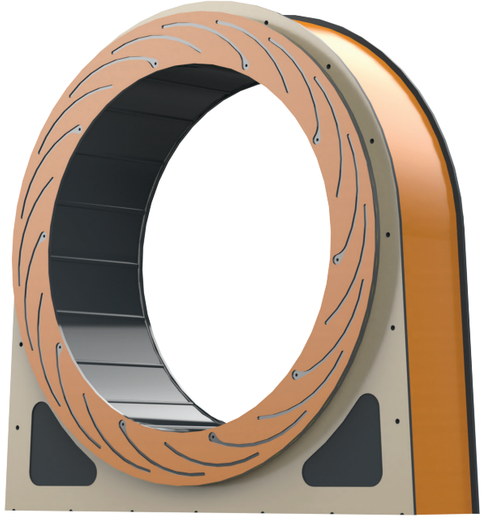

The rotating drum provides an exciting spinning experience for players, similar to moving inside a hamster wheel. Players can run, walk, or crawl inside the drum while it spins, improving their motor skills, balance, and coordination. The spinning action develops spatial awareness and encourages players to control their movements and maintain stability during the spin.

Designed Panel

The designed panel adds an aesthetic and unique dimension to the playground equipment, enhancing the overall play experience. The panel allows players to feel part of a creative and imaginative world, designed to align with the narrative of the playground. The design ensures easy and safe access to play activities, while maintaining a sense of security and enjoyment.

Motor Development

Foot-eye coordination - Improving coordination and balance through various equipment. Hand-eye coordination - Developing coordination and precision in activities requiring fine motor skills.

Cognitive Development

Concentration- Developing the ability to focus and maintain attention in equipment requiring concentration. Spatial awareness- Improving the ability to understand and navigate space through mazes and courses.. Regulation of force- Developing the ability to apply the right amount of force according to the activity.

Emotional Development

Courage- Facing fears and new challenges. Confidence- Building self-confidence and belief in one's personal abilities. Independence- Developing independence and the ability to make personal decisions. Patience- Practicing patience and waiting for one's turn.

Physical Development

Balancing- Improving balance and posture. Spinning - Improving balance and vestibular functions through carousels.

Social Development

Empathy- Developing empathy and the ability to understand and empathize with others' feelings. Respect for boundaries- Learning the importance of respecting personal and social boundaries. Empathy- Developing empathy and the ability to understand and empathize with others' feelings. Respect for boundaries- Learning the importance of respecting personal and social boundaries.
