Robinia Wood: ■ ■ ■ ■ ■ ■

Balancing

Climbing

Crawling

 Ages 2-12

 Users 65

 Dimensions L: 33'-4.6" W: 41' H: 7'-4.1" | L: 1020 W: 1250 H: 226 cm

 Safety Zone: 59'-0.9" | 1800 cm

 Fall Height 3'-1.8" | 97 cm

 Accessible

"A unique play maze for toddlers, inspired by the familiar and beloved wooden blocks. The structure is built from small elements in the shapes of arches, cylinders, and walls, creating an open play space that invites free wandering, exploration, and imagination. Children move between the blocks, enter through arched openings, crawl through small tunnels, and discover a new passage and small adventure at every corner. The simple and colorful composition creates the feeling of a small play village, where each element is a different stop along the path. The short passages, low heights, and open spaces allow toddlers to move safely, climb, hide for a moment, and then continue their small journey between the blocks. The structure is made of high-quality natural robinia wood, providing a warm and pleasant tactile experience while blending naturally into the environment. The combination of natural wood and soft colors creates an inviting play space full of curiosity, movement, and discovery.

Robinia Wood

European Robinia wood is natural, robust, and durable, particularly suitable for use in outdoor playground equipment. It complies with stringent standards such as FSC, has a smooth and pleasant touch, a natural and authentic appearance, and integrates well with natural surroundings. Its high durability, long lifespan, and being a natural and safe material make it a popular choice for use in playground equipment.

Hand and Foot Holds

Hand and foot holds provide support during play and use of the structure. Players develop their strength and coordination while maintaining stability and security.

Abacus

The abacus enhances players' mathematical and cognitive skills. Through play with the abacus, players learn to count, calculate, and solve mathematical problems in a fun and challenging way.

7'-4.1"

33'-4.6"

Motor Development

Hand-eye coordination - Developing coordination and precision in activities requiring fine motor skills. Foot-eye coordination - Improving coordination and balance through various equipment.

Cognitive Development

Concentration- Developing the ability to focus and maintain attention in equipment requiring concentration. Curiosity - Encouraging exploration and discovery through equipment providing new and unfamiliar experiences. Creativity- Developing creative thinking and imagination in open and interactive play.

Emotional Development

Courage- Facing fears and new challenges. Confidence- Building self-confidence and belief in one's personal abilities. Independence- Developing independence and the ability to make personal decisions. Patience- Practicing patience and waiting for one's turn. Achievement- Developing a sense of accomplishment and satisfaction from success in challenging equipment.

Social Development

Cooperation- Encouraging joint work and reaching shared goals. Communication- Developing effective and clear communication skills with playmates. Respect for boundaries- Learning the importance of respecting personal and social boundaries. Friendship creation- Creating friendships and strengthening social bonds.

Physical Development

Climbing - Strengthening arm and leg muscles, developing fitness and endurance. Balancing- Improving balance and posture. Crawling - Strengthening abdominal and back muscles, improving coordination and flexibility.

Sensory Development

Touch development- Diverse sensory experiences through different materials and textures. Vision development- Rich visual experiences through vibrant colors and shapes.
