Dimensions L: 3' W: 2'-7.8" H: 3' | L: 92 W: 85 H: 93 cm

Safety Zone: 14'-11.3" / 14'-10" | 455 / 452 cm

Fall Height 1'-6.4" | 50 cm

Accessible

The Peacock Spring Rider is a spring-mounted play figure featuring a double seat, crafted from durable HPL panels and mounted on a galvanized, curved, and powder-coated steel spring base. The design presents a charming animal-inspired character in the form of a decorative peacock.

This type of spring rocking experience is among the most beloved for early childhood users, thanks to its rhythmic and cyclical motion. Children often incorporate imaginative play into the movement, such as pretending to gallop or move forward on an adventure.

The unit is designed for single-child use at a time, offering not only a joyful play experience but also an important developmental lesson in patience, waiting one's turn, and consideration for others while sharing the equipment.

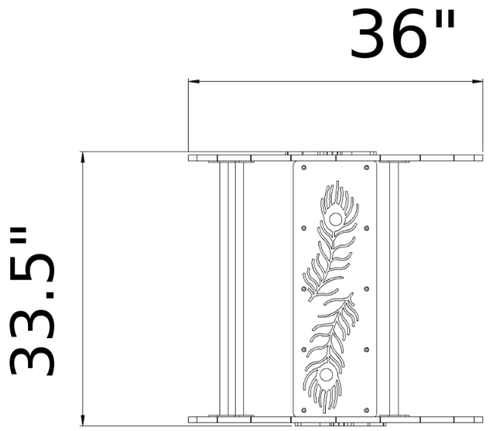

Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. It meets strict playground equipment standards such as ASTM A240 and EN 10088, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

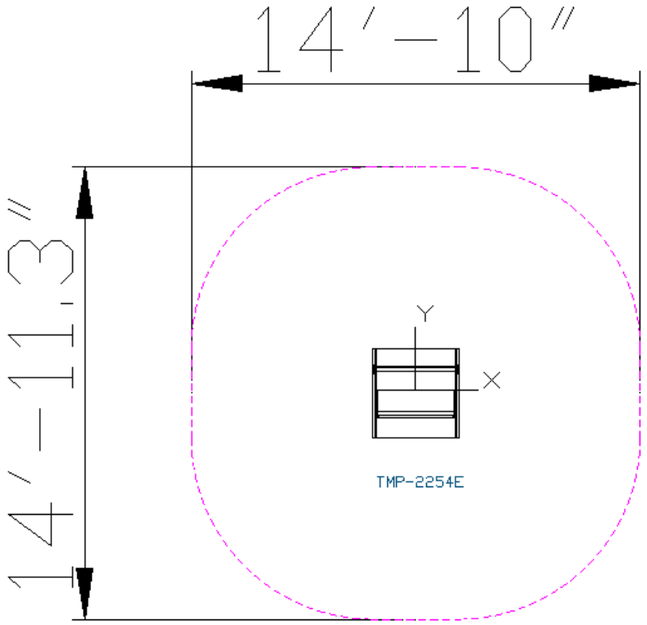

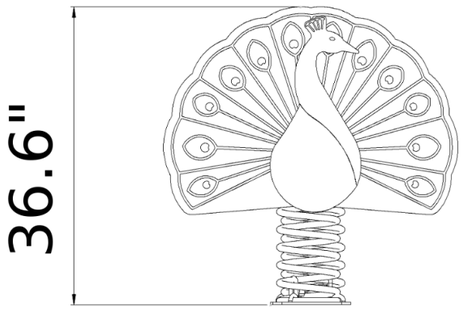

HPL

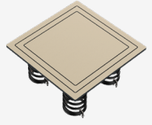

HPL panels are high-pressure laminate boards produced by saturating multiple layers of kraft paper with phenolic resin. These panels offer high resistance to abrasion, scratches, and chemical impacts, maintaining their quality in both outdoor and indoor conditions. Available in a variety of colors and textures, HPL panels are used for surfaces, walls, and furniture in playground equipment, providing an aesthetic appearance and requiring low maintenance.

Springy Mat

The springy mat encourages players to jump and move. Playing on the springy mat develops players' strength, coordination, and balance.

Seat

A seat that provides a small resting station during play where players can sit and rest. Suitable for short breaks or extended stays. Playing on the seat allows players to take a break from physical activity while maintaining connection with the environment and continuing social interactions.

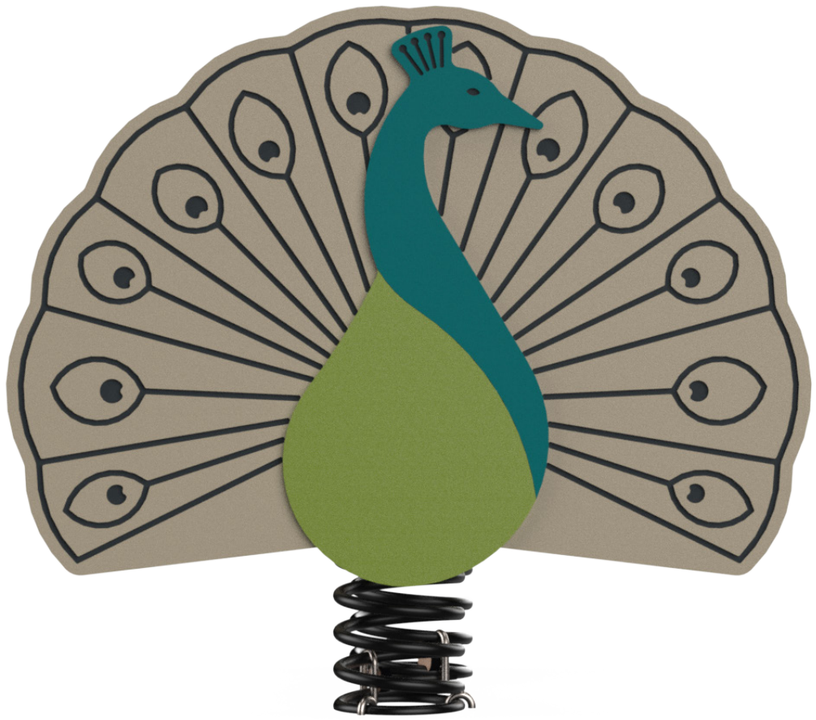

Hand and Foot Holds

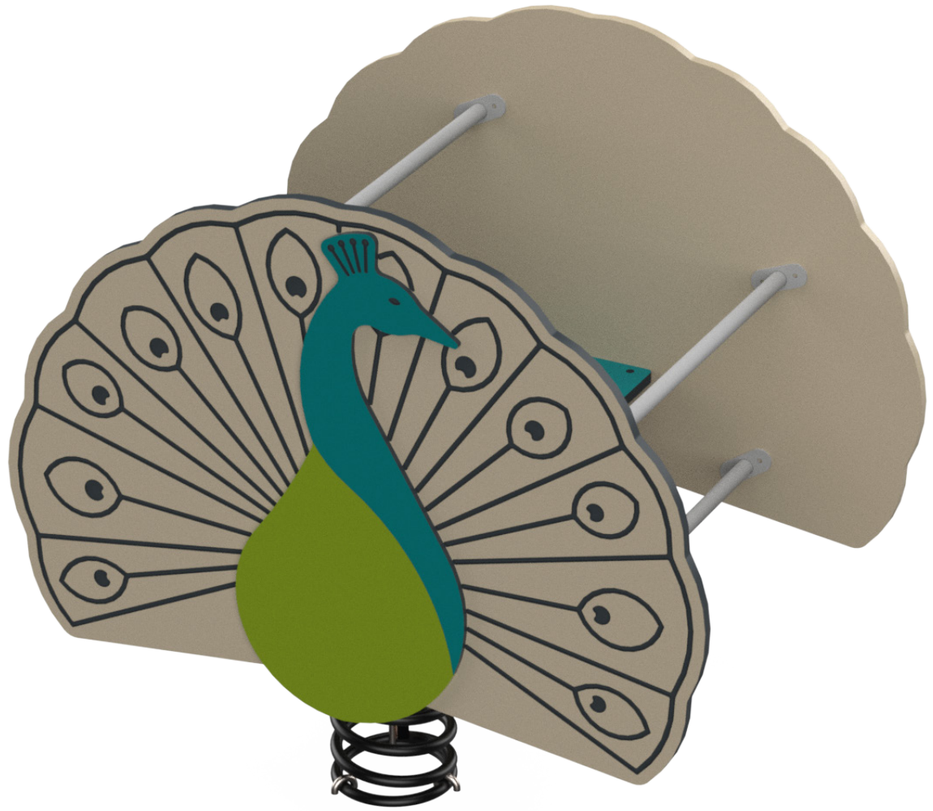

Hand and foot holds provide support during play and use of the structure. Players develop their strength and coordination while maintaining stability and security.

Springs

The springs are made of high-quality, durable materials, designed safely without pinching or entrapments. They allow for movement and rocking games, developing motor skills, spatial awareness, and a sense of balance.

Motor Development

Hand-eye coordination - Developing coordination and precision in activities requiring fine motor skills. Foot-eye coordination - Improving coordination and balance through various equipment.

Sensory Development

Touch development - Diverse sensory experiences through different materials and textures. Vision development - Rich visual experiences through vibrant colors and shapes.

Emotional Development

Courage - Facing fears and new challenges. Confidence - Building self-confidence and belief in one's personal abilities. Independence - Developing independence and the ability to make personal decisions. Patience - Practicing patience and waiting for one's turn.

Social Development

Respect for boundaries - Learning the importance of respecting personal and social boundaries. Friendship creation - Creating friendships and strengthening social bonds.

Physical Development

Jumping - Improving leg strength and balance.
