Ages 2-5

Users 10

Dimensions L: 112" W: 63" H: 57" | L: 285 W: 160 H: 132 cm

Safety Zone: 21'-3.4" / 17'-2.4" | 646 / 524 cm

Fall Height 1'-9.6" | 60 cm

This toddler play structure is designed in the form of a friendly and playful dinosaur, inviting children into a small adventure world filled with imagination and discovery. The dinosaur's body creates a diverse play environment, including a climbing surface with colorful stepping stones, a small and enjoyable slide, and a pleasant crawl tunnel passing beneath its body. Children can climb, crawl, slide, and discover new ways to play around the welcoming character each time.

The soft, rounded form and low-height elements create a smooth and safe play experience that encourages movement, curiosity, and exploration. Children can climb along the dinosaur's back, slide down the gentle slide, and continue their adventure through openings and passageways.

The structure is made from natural, durable robinia wood combined with colorful HPL panels, creating a cheerful and inviting appearance. This combination of materials provides a warm, natural feel alongside playful colors, making it a highly attractive and beloved play feature for toddlers.

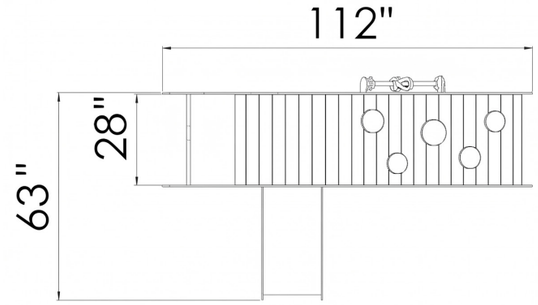

Robinia Wood

European Robinia wood is natural, robust, and durable, particularly suitable for use in outdoor playground equipment. It complies with stringent standards such as FSC, has a smooth and pleasant touch, a natural and authentic appearance, and integrates well with natural surroundings. Its high durability, long lifespan, and being a natural and safe material make it a popular choice for use in playground equipment.

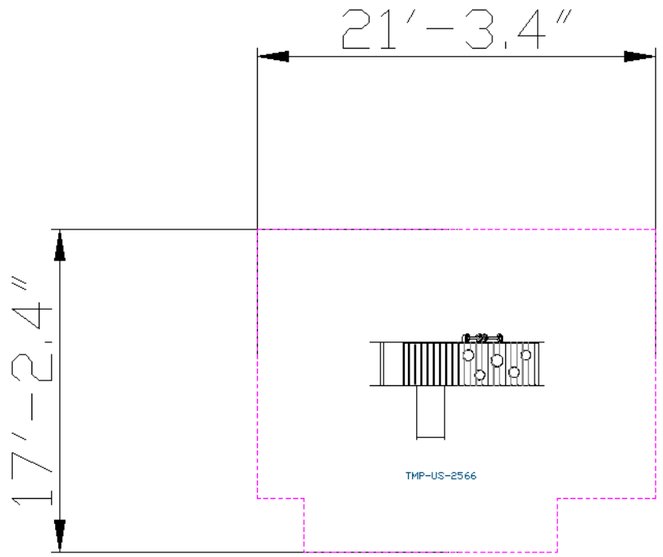

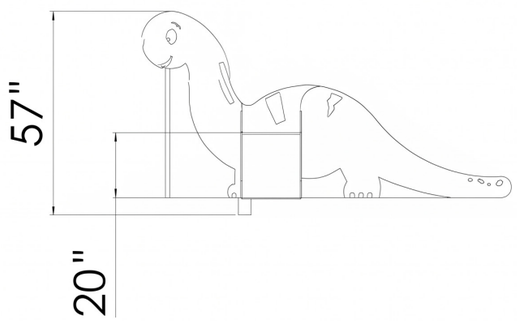

HPL

HPL panels are high-pressure laminate boards produced by saturating multiple layers of kraft paper with phenolic resin. These panels offer high resistance to abrasion, scratches, and chemical impacts, maintaining their quality in both outdoor and indoor conditions. Available in a variety of colors and textures, HPL panels are used for surfaces, walls, and furniture in playground equipment, providing an aesthetic appearance and requiring low maintenance.

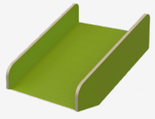

Sliding Pole

The sliding pole allows for a quick and safe descent from the play structure, providing a fun and thrilling play experience. Young players can feel like firefighters in action. Using the pole strengthens hand and upper body muscles. Players learn to control the speed and direction of their descent, contributing to the development of control skills and self-confidence.

Sliding Surface

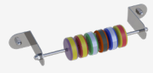

The sliding surface provides a smooth and enjoyable movement experience, encouraging players to improve their coordination and balance while sliding or climbing.

Hand and Foot Holds

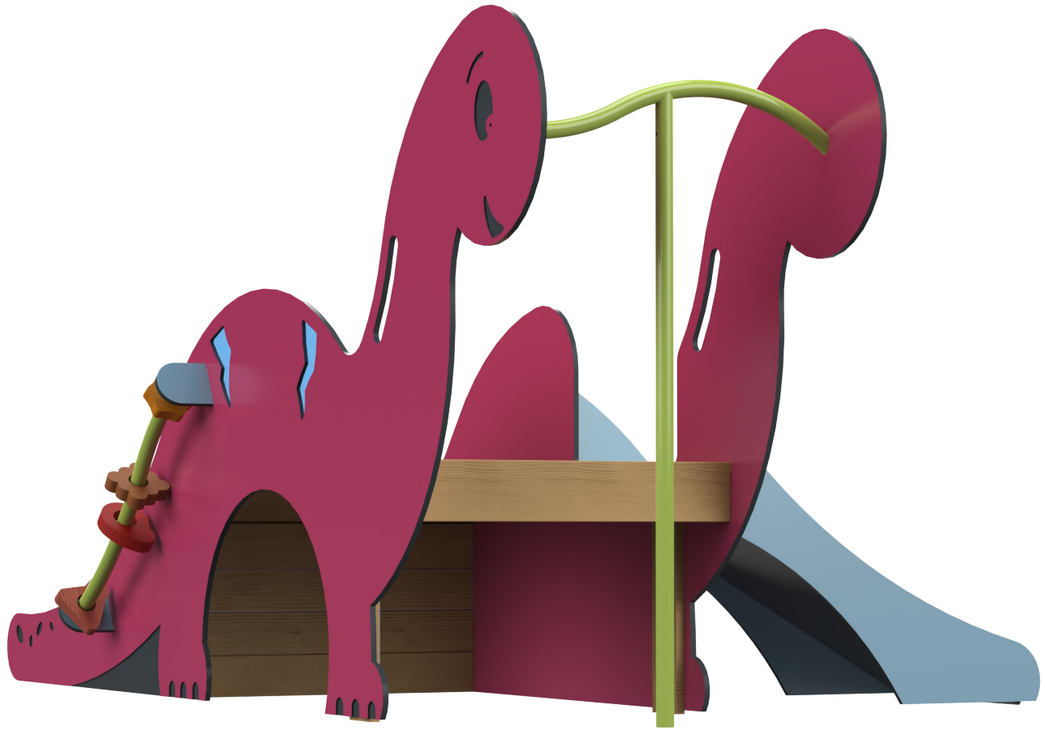

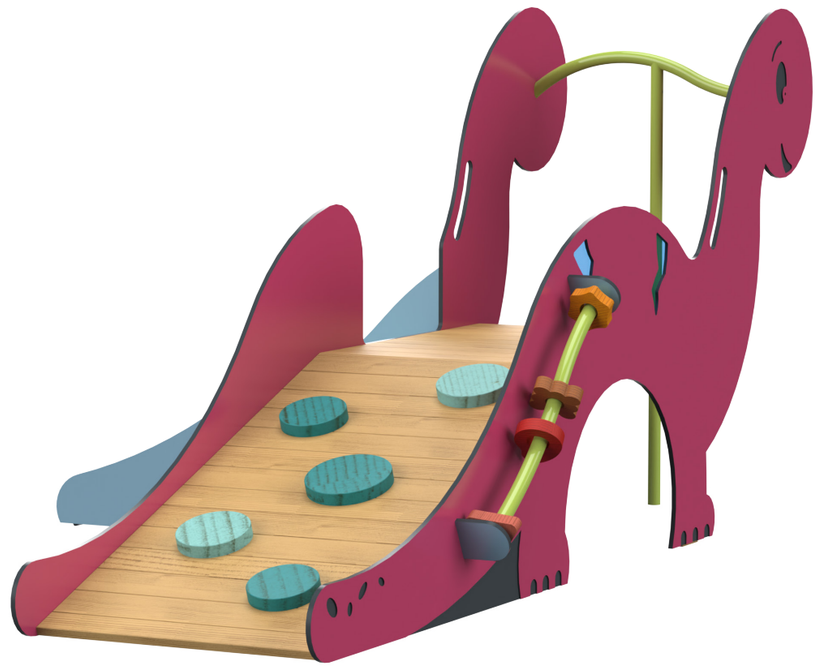

Hand and foot holds provide support during play and use of the structure. Players develop their strength and coordination while maintaining stability and security.

Abacus

The abacus enhances players' mathematical and cognitive skills. Through play with the abacus, players learn to count, calculate, and solve mathematical problems in a fun and challenging way.

Motor Development

Core muscle strengthening - Strengthening abdominal and back muscles through challenging equipment. Fine motor skills - Developing precise control in small movements through activities requiring fine manual skills.

Cognitive Development

Concentration - Developing the ability to focus and maintain attention in equipment requiring concentration. Curiosity - Encouraging exploration and discovery through equipment providing new and unfamiliar experiences. Creativity - Developing creative thinking and imagination in open and interactive play.

Emotional Development

Courage - Facing fears and new challenges. Confidence - Building self-confidence and belief in one's personal abilities. Independence - Developing independence and the ability to make personal decisions. Resilience - Coping with failure and trying again.

Social Development

Cooperation - Encouraging joint work and reaching shared goals. Communication - Developing effective and clear communication skills with playmates. Friendship creation - Creating friendships and strengthening social bonds.

Physical Development

Climbing - Strengthening arm and leg muscles, developing fitness and endurance. Hanging - Strengthening arm, back, and shoulder muscles. Sliding - Strengthening leg and arm muscles and improving coordination.
