Dimensions L: 17' W: 4'-5.9" H: 10'-1.7" | L: 420 W: 140 H: 310 cm

Safety Zone: 25'-9.3" / 16'-7.7" | 786 / 507 cm

Fall Height 5'-9.7" | 182 cm

This modular ninja-style play system allows the creation of a dynamic and highly varied obstacle course. Each element in the course functions as a standalone challenge station, encouraging users to test strength, agility, balance, and coordination in a true ninja-training style experience.

The system is composed of a wide range of components designed for upper-body, lower-body, and climbing challenges-such as grip rings, horizontal ladders, traversal obstacles, climbing walls, and balance elements. Each feature delivers a distinct movement challenge, while together they form a continuous and engaging progression along the course.

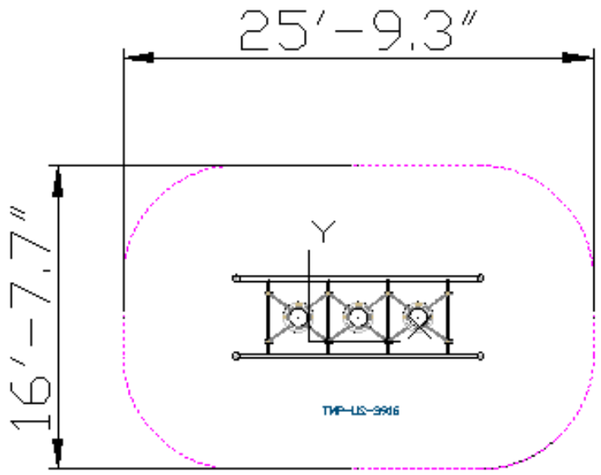

The configuration of elements and their order can be customized, enabling the creation of a tailored ninja course with adjustable difficulty levels. The combination of components results in a powerful, dynamic, and exciting training environment that develops strength, movement control, and the spirit of determination inspired by ninja-style training.

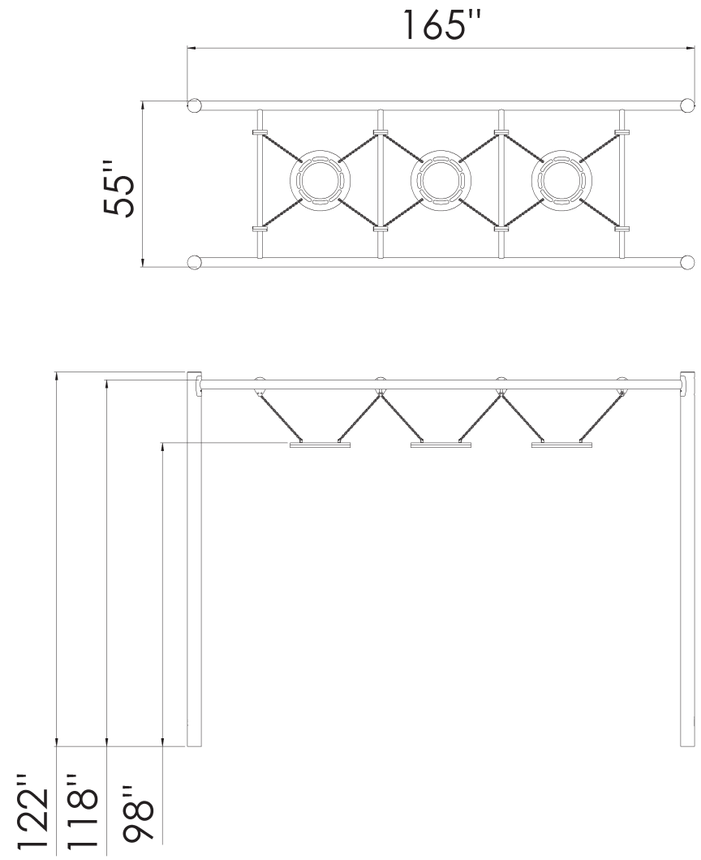

## Steel

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. It meets strict playground equipment standards such as ASTM A240 and EN 10088, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

### Motor Development

Hand-eye coordination - Developing coordination and precision in activities requiring fine motor skills. Foot-eye coordination - Improving coordination and balance through various equipment. Core muscle strengthening - Strengthening abdominal and back muscles through challenging equipment.

### Cognitive Development

Concentration - Developing the ability to focus and maintain attention in equipment requiring concentration. Regulation of force - Developing the ability to apply the right amount of force according to the activity.

### Emotional Development

Courage - Facing fears and new challenges. Confidence - Building self-confidence and belief in one's personal abilities. Independence - Developing independence and the ability to make personal decisions. Patience - Practicing patience and waiting for one's turn. Initiative - Encouraging initiative and taking an active role in play. Perseverance - Encouraging perseverance and repeated attempts. Achievement - Developing a sense of accomplishment and satisfaction from success in challenging equipment.

### Social Development

Communication - Developing effective and clear communication skills with playmates. Respect for boundaries - Learning the importance of respecting personal and social boundaries.

### Physical Development

Climbing - Strengthening arm and leg muscles, developing fitness and endurance. Hanging - Strengthening arm, back, and shoulder muscles.
