Safety Zone: 25'-9.3" / 16'-6.4" | 786 / 504 cm

Fall Height 6'-5.6" | 200 cm

This modular ninja-style system enables the creation of a dynamic and highly varied obstacle course. Each element along the course functions as an independent challenge station, inviting users to test strength, agility, balance, and coordination in a ninja-inspired training experience.

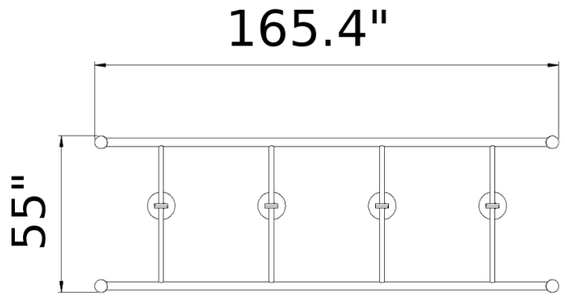

The system is composed of a wide range of elements designed for upper- and lower-body challenges and climbing skills-such as grip rings, horizontal ladders, traversal obstacles, climbing walls, and balance challenges. Each element offers a distinct movement experience while collectively forming a continuous and engaging progression throughout the course.

Clients can select the composition and sequence of elements, allowing for a fully customized ninja course with adjustable difficulty levels. The combination of components results in a challenging, dynamic, and exciting environment that develops physical strength, movement control, and the resilient spirit associated with ninja-style training.

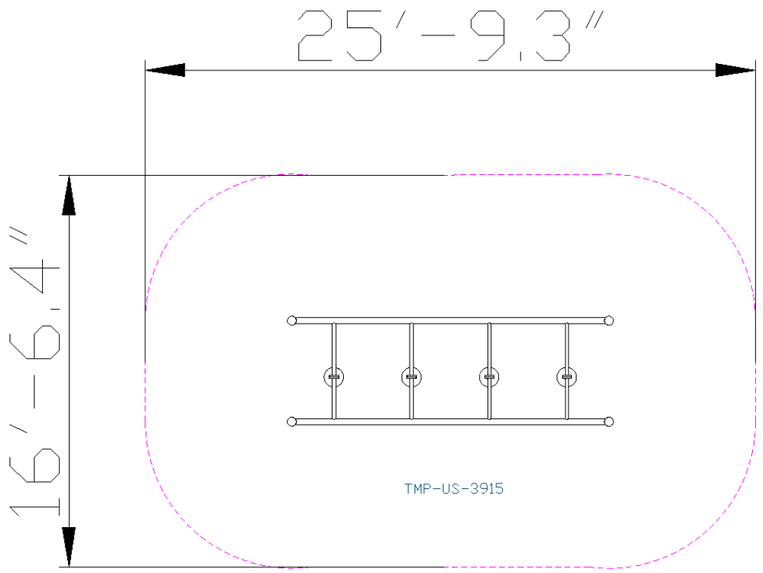

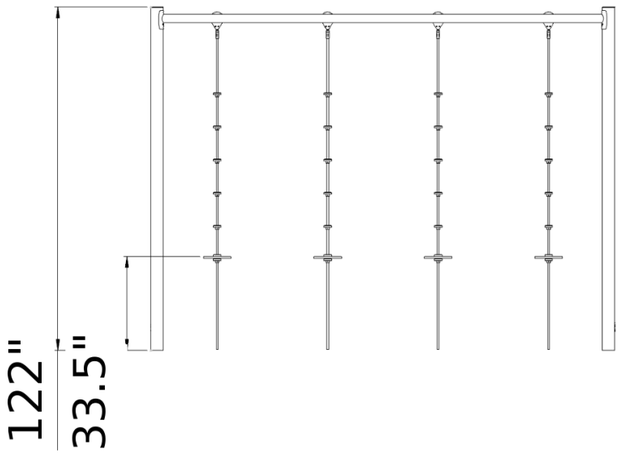

Steel

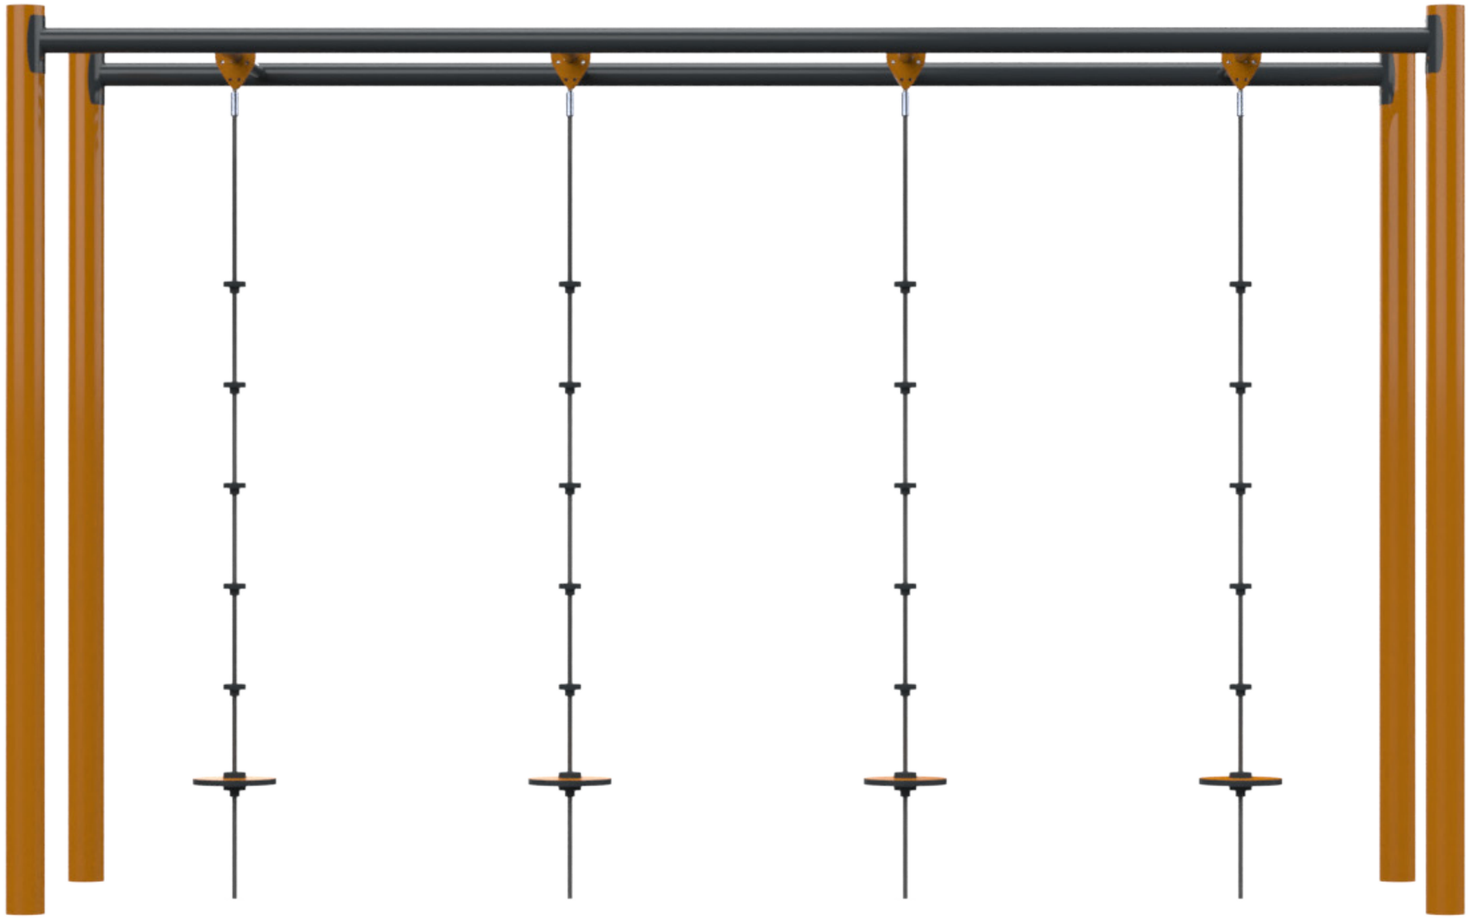

Steel structure that is strong and durable, oven-painted galvanized and coated with lead-free polyester powder for corrosion and rust resistance. It meets strict playground equipment standards such as ASTM A240 and EN 10088, ensuring high quality and safety. The steel is anti-vandalistic, requires minimal maintenance, and is fully recyclable. The high-quality paint ensures weather resistance and maintains a new appearance over time.

Motor Development

Hand-eye coordination - Developing coordination and precision in activities requiring fine motor skills. Foot-eye coordination - Improving coordination and balance through various equipment. Core muscle strengthening - Strengthening abdominal and back muscles through challenging equipment.

Cognitive Development

Concentration - Developing the ability to focus and maintain attention in equipment requiring concentration. Regulation of force - Developing the ability to apply the right amount of force according to the activity.

Emotional Development

Courage - Facing fears and new challenges. Confidence - Building self-confidence and belief in one's personal abilities. Independence - Developing independence and the ability to make personal decisions. Patience - Practicing patience and waiting for one's turn. Initiative - Encouraging initiative and taking an active role in play. Perseverance - Encouraging perseverance and repeated attempts. Achievement - Developing a sense of accomplishment and satisfaction from success in challenging equipment.

Social Development

Communication - Developing effective and clear communication skills with playmates. Respect for boundaries - Learning the importance of respecting personal and social boundaries.

Physical Development

Climbing - Strengthening arm and leg muscles, developing fitness and endurance. Hanging - Strengthening arm, back, and shoulder muscles.
